Listen carefully and tell me if s/he has any of the following symptoms:

- Difficulty breathing or shortness of breath
- Persistent cough
- Measured body temperature > 38°C (100°F)
- Chills
- Unusual sweats
- Hot to the touch in room temperature
- Body aches
- Sore throat
- Nasal congestion (blocked nose)
- Runny or stuffy nose
- Contact with someone with the flu or flu-like symptoms (if so, when?)

Ask only in early phases when new flu is emerging from specific areas:

- Travelled recently (if so, where?)
