

 Severe Respiratory Infection (Swine Flu) Symptoms

 Cancel

Info Completed 

Listen carefully and tell me if s/he has any of the following symptoms:

- difficulty breathing or shortness of breath
- persistent cough
- measured body temperature > 38° C (100° F)
- chills
- unusual sweats
- hot to the touch in room temperature
- body aches
- sore throat
- nasal congestion (blocked nose)
- runny or stuffy nose
- contact with someone with the flu or flu-like symptoms (if so, when?)

Ask only in early phases when new flu is emerging from specific areas:

- travelled recently (if so, where?)
